# 1 Inleiding

## 1.1 Aanleiding

BPD Ontwikkeling B.V. is voornemens om samen met Zeeman Real Estate de nieuwe woonwijk Molenblik aan de zuidwestzijde van de kern Medemblik te realiseren. Er zijn circa 220 woningen beoogd. Antea Group is gevraagd de hiervoor benodigde onderzoeken uit te voeren. De onderzoeken vormen de basis om de uitvoerbaarheid van het bestemmingsplan aan te tonen. Het voorliggende akoestisch onderzoek is één van deze benodigde onderzoeken.

In onderstaande afbeelding is de locatie van het plangebied globaal weergegeven.

Afbeelding 1.1: Globale ligging planlocatie Molenblik (bron: cyclomedia 2021)

## 1.2 Doel

Het doel van het akoestisch onderzoek is inzicht te geven in de geluidbelasting op de nieuwe geluidgevoelige bestemmingen (woningen), vanwege de omliggende wegen. Daarnaast wordt, aan de hand van de uitkomsten van dit onderzoek, bepaald of wordt voldaan aan de grenswaarde ingevolge de Wet geluidhinder.

## 1.3 Leeswijzer

De rapportage is als volgt opgebouwd:

- Hoofdstuk 2 beschrijft het juridisch kader;
- De onderzoeksopzet en uitgangspunten komen aan de orde in hoofdstuk 3;
- In hoofdstuk 4 worden de rekenresultaten getoetst;
- In hoofdstuk 5 ten slotte wordt een samenvatting en een conclusie gegeven.

## 2 Juridisch kader

### 2.1 Wet geluidhinder - wegverkeerslawaai

#### 2.1.1 Algemeen

De Wet geluidhinder (Wgh) is alleen van toepassing binnen de wettelijk vastgestelde zone van de weg. De breedte van de geluidzone langs wegen is geregeld in artikel 74 Wgh en is gerelateerd aan het aantal rijstroken van de weg en het type weg (stedelijk of buitenstedelijk). De ruimte boven en onder de weg behoort eveneens tot de zone van de weg. De betreffende zonebreedtes zijn in tabel 2.1 weergegeven.

Tabel 2.1: Zonebreedte wegverkeer

| Aantal rijstroken | Zonebreedte [m]  |                        |
|-------------------|------------------|------------------------|
|                   | Stedelijk gebied | Buitenstedelijk gebied |
| 5 of meer         | -                | 600                    |
| 3 of meer         | 350              | -                      |
| 3 of 4            | -                | 400                    |
| 1 of 2            | 200              | 250                    |

Het stedelijk gebied wordt in de Wgh gedefinieerd als 'het gebied binnen de bebouwde kom doch voor de toepassing van de hoofdstukken VI en VII met uitzondering van het gebied binnen de bebouwde kom, voor zover liggend binnen de zone van een autoweg of autosnelweg'. Dit laatste gebied valt onder het buitenstedelijk gebied.

Binnen de zone van een weg dient een akoestisch onderzoek plaats te vinden naar de geluidbelasting op de binnen de zone gelegen woningen en andere geluidgevoelige bestemmingen. Bij het berekenen van de geluidbelasting wordt de  $L_{den}$ -waarde in dB bepaald.

De berekende geluidbelasting dient getoetst te worden aan de grenswaarden van de Wet geluidhinder. Indien de (voorkeurs)grenswaarde wordt overschreden, dient beoordeeld te worden of maatregelen ter beperking van het geluid mogelijk zijn. Als maatregelen niet mogelijk zijn, kan een hogere grenswaarde worden vastgesteld door het college van burgemeester en wethouders.

In artikel 82 en volgende worden de grenswaarden vermeld met betrekking tot nieuwe situaties bij zones. In artikel 3.1 en 3.2 van het Besluit geluidhinder worden de grenswaarden van geluidgevoelige gebouwen als bedoeld in artikel 1 van de Wgh<sup>1</sup> vermeld. In tabel 2.2 zijn deze waarden (voorkeursgrenswaarden en de maximaal toelaatbare geluidbelasting) opgenomen.

<sup>1</sup> Onderwijsgebouw, ziekenhuis, verpleeghuis, verzorgingstehuis, een psychiatrische inrichting, kinderdagverblijf.

Tabel 2.2: Grenswaarden voor woningen langs een bestaande weg

| Status van de woning                            | Voorkeursgrenswaarde [dB] | Maximaal toegestane geluidbelasting [dB] |                  |
|-------------------------------------------------|---------------------------|------------------------------------------|------------------|
|                                                 |                           | Stedelijk                                | Buitenstedelijk* |
| nieuw te bouwen woningen                        | 48                        | 63                                       | 53               |
| vervangende nieuwbouw (woningen)                | 48                        | 68                                       | 58               |
| nieuw te bouwen agrarische woning               | 48                        | 58                                       | 58               |
| nieuw te bouwen andere geluidgevoelige gebouwen | 48                        | 63                                       | 53               |

\*) Geluidgevoelige bestemmingen gelegen binnen de zone van een (auto)snelweg worden tot het buitenstedelijk gebied gerekend

### 2.1.2 Aftrek ex artikel 110g Wet geluidhinder

Ingevolge artikel 110g van de Wet geluidhinder dient het resultaat van berekening en meting van de geluidbelasting vanwege wegverkeer te worden gecorrigeerd met een aftrek in dB.

De hoogte van de aftrek is geregeld in artikel 3.4 van het 'Reken- en Meetvoorschrift geluid 2012'. Op basis van dit voorschrift dient voor wegen waarvoor de representatief te achten snelheid van lichte motorvoertuigen 70 km/uur of meer bedraagt, een aftrek van 2 dB te worden toegepast met uitzondering van 2 specifieke situaties:

- Indien de geluidbelasting vanwege de weg zonder toepassing van artikel 110g van de Wet geluidhinder 56 dB is, geldt een aftrek van 3 dB;
- Indien de geluidbelasting vanwege de weg zonder toepassing van artikel 110g van de Wet geluidhinder 57 dB is, geldt een aftrek van 4 dB.

Voor de overige zoneplichtige wegen bedraagt de aftrek 5 dB.

### 2.1.3 30 km/uur zone

Een weg waar de maximale snelheid 30 km/uur bedraagt, is in de zin van de Wet geluidhinder niet-zoneplichtig. Een akoestisch onderzoek is voor dergelijke wegen derhalve niet noodzakelijk.

Gelet op de jurisprudentie aangaande dit punt blijkt echter dat, bij een ruimtelijke procedure, de geluidinvloed van 30 km/uur wegen wel dient te worden beschouwd. Er dient sprake te zijn van een 'deugdelijke motivering' bij het vaststellen van een bestemmingsplan.

In de zin van de Wet geluidhinder zijn geen streef- en/of grenswaarden gesteld aan dergelijke wegen.

## 2.2 Cumulatie

Indien een geluidgevoelige bestemming waarvoor een hogere grenswaarde wordt vastgesteld in de zone van meerdere geluidbronnen ligt, dient inzichtelijk gemaakt te worden hoe hoog de gecumuleerde geluidbelasting is. Het bevoegd gezag dient dan een oordeel te vellen over de hoogte van deze geluidbelasting. Een wettelijke toets aan de grenswaarde is niet aan de orde.

## 2.3 Toetsingskader plansituatie

De te realiseren woningen zijn gelegen binnen de zones van de Markerwaardweg (N240), de Bolzijl en de Brakeweg. Op de Markerwaardweg geldt een maximumsnelheid van 80 km/uur. Op de Bolzijl en de Brakeweg geldt een maximumsnelheid van 60 km/uur. De wegen zullen worden getoetst aan de voorkeursgrenswaarde van 48 dB inclusief aftrek ex artikel 110g Wgh.

Tabel 2.3: Wegen rondom plangebied

| Straat                | Maximum toegestane snelheid |
|-----------------------|-----------------------------|
| Markerwaardweg (N240) | 80 km/uur                   |
| Bolzijl               | 60 km/uur                   |
| Brakeweg              | 60 km/uur                   |

## 3 Uitgangspunten en onderzoekopzet

### 3.1 Onderzoeksgebied

Afbeelding 3.1 toont het overzicht van het plangebied. Het plangebied zal worden getoetst aan de geluidbelasting met een richtwaarde van 48 dB inclusief aftrek ex artikel 110g Wgh. Voor de nieuw te bouwen woningen geldt een maximale ontheffingswaarde van 63 dB inclusief aftrek ex artikel 110g Wgh.

Afbeelding 3.1: Overzicht plangebied

### 3.2 Rekenmethode

Voor het bepalen van het geluidniveau vanwege het wegverkeer zijn twee wettelijk vastgestelde rekenmethodes voorhanden: de Standaardrekenmethode 1 en de Standaardrekenmethode 2 uit het 'Reken- en meetvoorschrift geluid 2012' ex artikel 110d van de Wet geluidhinder, kortweg aangeduid als SRM1 respectievelijk SRM2.

De SRM2 is een rekenmethode waarbij rekening kan worden gehouden met afscherming van objecten, hetgeen met de SRM1 niet mogelijk is. De berekeningen voor het onderzoek zijn dan ook uitgevoerd conform SRM2. De berekeningen zijn uitgevoerd met één reflectie en een sectorhoek van 2 graden.

In onderhavig onderzoek zijn de betreffende wegen en de directe omgeving ingevoerd in een grafisch computermodel dat rekt volgens de Standaardrekenmethode 2 uit het 'Reken- en meetvoorschrift geluid 2012'. Daarbij is gebruikgemaakt van het programma Geomilieu versie 2020.2.

### 3.3 Uitgangspunten

#### Rekenmethode en richtjaar

Voor de bepaling van de geluidbelastingen vanwege het wegverkeer is een rekenmodel opgesteld. In het model zijn de omliggende bebouwing, bodemgebieden, hoogtekenmerken en de relevante wegen opgenomen. Met behulp van het geluidrekenmodel is de geluidbelasting voor het richtjaar 2031 berekend.

De diverse gebouwen zijn in de berekeningen zowel afschermend als reflecterend meegenomen. Voor de relevante woningen of groepen van woningen zijn in het berekeningsmodel ontvangerpunten opgenomen. Voor de berekeningen is uitgegaan van waarnemhoogtes van 1,50 meter (begane grond), 4,50 meter (eerste verdieping) en 7,50 meter (tweede verdieping) boven lokaal maaiveld.

#### Omgevingskenmerken

Het gehele onderzoeksgebied is gezien de gesteldheid van de bodem grotendeels als akoestisch zacht ( $B_f = 1,0$ ) te kenmerken. Verharde gebieden zijn als apart hard bodemgebied gemodelleerd ( $B_f = 0,0$ ). De diverse (bestaande) gebouwen buiten het plangebied zijn in de berekeningen zowel afschermend als reflecterend meegenomen.

#### Verkeersgegevens

De verkeersgegevens zijn afkomstig uit de memo 'Parkeer- en verkeersgeneratie', projectnummer, 0467982.101, d.d 30 maart 2021. In de betreffende memo is verkeersafwikkeling onderzocht als gevolg van de nieuwe woningen en welke mogelijke effecten dit zal hebben op het omliggend wegennet. De memo geeft echter geen inzage over de binnenplanse wegen. Hier zijn geen verkeersgegevens over bekend. Derhalve is niet onderzocht wat de geluidbelasting is van de binnenplanse wegen op de nieuw te realiseren woningen.

De voor de berekening gehanteerde intensiteiten, snelheden en wegdektypen worden weergegeven in tabel 3.1. Afbeelding 3.2 toont de wegvakken overeenkomstig met tabel 3.1.

Tabel 3.1: Etmaalintensiteiten, snelheden en wegdektypen per weg

| Naam                  | Kleur  | Etmaalintensiteit 2031 | Snelheid [km/u] | Wegdektype            |
|-----------------------|--------|------------------------|-----------------|-----------------------|
| Markerwaardweg (N240) | Green  | 7.783                  | 80              | W0 - Referentiewegdek |
| Bolzijl               | Blue   | 440                    | 60              | W0 - Referentiewegdek |
| Bolzijl               | Red    | 537                    | 60              | W0 - Referentiewegdek |
| Brakeweg              | Yellow | 263                    | 60              | W0 - Referentiewegdek |

Afbeelding 3.2: Overzichtskaart wegen corresponderend met tabel 3.1

## 4 Resultaten en toetsing

Met behulp van het rekenmodel is op alle ontvangerspunten de geluidbelasting vanwege het wegverkeer op de gevels van de nieuw te realiseren woningen voor het zichtjaar 2031 berekend. Een overzicht van de beoordelingspunten is terug te vinden in figuur 2 van de bijlage. Per weg is de geluidbelasting berekend op de beoordelingspunten. Tevens is de cumulatie van de geluidbelasting op de beoordelingspunten berekend. De rekenresultaten zijn terug te vinden in bijlage 2.

### 4.1 Markerwaardweg (N240)

De geluidbelasting van het wegverkeer op de Markerwaardweg op de te beoordelen gevels bedraagt ten hoogste 45 dB inclusief 2 dB aftrek ingevolge artikel 110g Wet geluidhinder en ligt daarmee ruim onder de voorkeursgrenswaarde van 48 dB. Als gevolg van deze weg zijn er geen akoestische belemmeringen voor het plan.

### 4.2 Bolzijl

De geluidbelasting van het wegverkeer op de Bolzijl op de te beoordelen gevels bedraagt ten hoogste 30 dB inclusief 5 dB aftrek ingevolge artikel 110g Wet geluidhinder en ligt daarmee ruim onder de voorkeursgrenswaarde van 48 dB. Als gevolg van deze weg zijn er geen akoestische belemmeringen voor het plan.

### 4.3 Brakeweg

De geluidbelasting van het wegverkeer op de Brakeweg op de te beoordelen gevels bedraagt ten hoogste 40 dB inclusief 5 dB aftrek ingevolge artikel 110g Wet geluidhinder en ligt daarmee ruim onder de voorkeursgrenswaarde van 48 dB. Als gevolg van deze weg zijn er geen akoestische belemmeringen voor het plan.

## 5 Samenvatting en conclusie

BPD Ontwikkeling B.V. is voornemens om samen met Zeeman Real Estate de nieuwe woonwijk Molenblik aan de zuidwestzijde van de kern Medemblik te realiseren. Er zijn circa 220 woningen beoogd. Antea Group is gevraagd de hiervoor benodigde onderzoeken uit te voeren. De onderzoeken vormen de basis om de uitvoerbaarheid van het bestemmingsplan aan te tonen. Het voorliggende akoestisch onderzoek is één van deze benodigde onderzoeken.

Het doel van het akoestisch onderzoek is inzicht te geven in de geluidbelasting op de nieuwe geluidgevoelige bestemmingen (woningen), vanwege de omliggende wegen. Daarnaast wordt, aan de hand van de uitkomsten van dit onderzoek, bepaald of wordt voldaan aan de grenswaarde ingevolge de Wet geluidhinder.

### Markerwaardweg

De geluidbelasting van het wegverkeer op de Markerwaardweg op de te beoordelen gevels bedraagt ten hoogste 45 dB inclusief 2 dB aftrek ingevolge artikel 110g Wet geluidhinder en ligt daarmee onder de voorkeursgrenswaarde van 48 dB. Als gevolg van deze weg zijn er geen akoestische belemmeringen voor het plan.

### Bolzijl

De geluidbelasting van het wegverkeer op de Bolzijl op de te beoordelen gevels bedraagt ten hoogste 30 dB inclusief 5 dB aftrek ingevolge artikel 110g Wet geluidhinder en ligt daarmee ruim onder de voorkeursgrenswaarde van 48 dB. Als gevolg van deze weg zijn er geen akoestische belemmeringen voor het plan.

### Brakeweg

De geluidbelasting van het wegverkeer op de Brakeweg op de te beoordelen gevels bedraagt ten hoogste 40 dB inclusief 5 dB aftrek ingevolge artikel 110g Wet geluidhinder en ligt daarmee ruim onder de voorkeursgrenswaarde van 48 dB. Als gevolg van deze weg zijn er geen akoestische belemmeringen voor het plan.

## Over Antea Group

Antea Group is het thuis van 1500 trotse ingenieurs en adviseurs. Samen bouwen wij elke dag aan een veilige, gezonde en toekomstbestendige leefomgeving. Je vindt bij ons de allerbeste vakspecialisten van Nederland, maar ook innovatieve oplossingen op het gebied van data, sensing en IT. Hiermee dragen wij bij aan de ontwikkeling van infra, woonwijken of waterwerken. Maar ook aan vraagstukken rondom klimaatadaptatie, energietransitie en de vervangingsopgave. Van onderzoek tot ontwerp, van realisatie tot beheer: voor elke opgave brengen wij de juiste kennis aan tafel. Wij denken kritisch mee en altijd vanuit de mindset om samen voor het beste resultaat te gaan. Op deze manier anticiperen wij op de vragen van vandaag en de oplossingen voor morgen. Al 70 jaar.
