b.k. afgewerkte begane grondvloer = PEIL

Technical cross-section drawing of a wall and floor junction. The wall on the left is composed of three layers: 100mm of kalkzandsteen (lime sandstone), 50mm of kalkzandsteen, and 50mm of minerale wol (mineral wool). The floor on the right consists of 100mm of kalkzandsteen, 50mm of Isolafix Rockfitt Premium Silver (a 140mm thick rigid insulation board), and a metal framework (metselwerk). Dimensions are indicated in millimeters: 100, 50, 50 for the wall layers; 100, 50, 50 for the floor layers; and 100, 50, 50 for the total floor thickness. A vertical dimension of 100 is shown for the floor's height above the base level.

Legend:

- Kalkzandsteen
- Isolafix Rockfitt Premium Silver (o.g.: 140mm)
- metselwerk

Labels in the drawing:

- kalkzandsteen
- kalkzandsteen
- minerale wol
- Kalkzandsteen
- Isolafix Rockfitt Premium Silver (o.g.: 140mm)
- metselwerk
