

Notitie

Onderwerp: Bestemmingsplan Ekkerweg 2 en Beeken 3 - Geurhinder
 Projectnummer: 340748
 Referentienummer: SWNL0260355
 Datum: 19-06-2020

1 Inleiding

Het perceel aan de Ekkerweg 2 in Westerhoven, bestaande uit een agrarisch bedrijf met de daarbij behorende gebouwen en gronden wordt herontwikkeld. Daarbij wordt gebruik gemaakt van de 'Ruimte voor Ruimte'-regeling. Om het plan economisch rendabel te maken, dienen dertien woonkavels te worden gerealiseerd. De locatie aan de Beeken 3 wordt omgevormd van een varkenshouderij naar een paardenhouderij. Voor deze ontwikkelingen moet een bestemmingsplanprocedure worden doorlopen. Voor deze procedure zijn diverse milieuonderzoeken nodig. In deze notitie is het onderzoek naar geurhinder beschreven.

Figuur 1-1 Ligging plangebied

2 Toetsingskader

De veehouderij speelt bij de planologische ontwikkelingen in en nabij het buitengebied, in relatie tot het aspect geur, meestal een rol in Nederland. Bij besluitvorming over ruimtelijke plannen moet voor het aspect geur getoetst worden aan de omgekeerde werking. Hierbij wordt bepaald of het plan niet in strijd is met de wet- en regelgeving en of er sprake is van een goede ruimtelijke ordening.

2.1 Wet geurhinder en veehouderij

Voor het aspect geur en veehouderijen is de normering vastgelegd in de Wet geurhinder en veehouderij (Wgv). Deze wet bevat afstandsnormen en geurbelastingsnormen die in acht moeten worden genomen bij de besluitvorming. In bijlage 1 is een overzicht opgenomen met de normen uit de Wgv. Hierbij geldt dat geurgevoelige objecten die binnen de contouren van de geldende geurnormen (afstands- en geurbelastingsnormen) zijn geprojecteerd, in beginsel niet toelaatbaar zijn. Een object binnen deze contouren zal namelijk mogelijk hinder ondervinden van de veehouderij. Tevens zou het ontstaan van een nieuw object binnen deze contouren van een veehouderij een beperking op kunnen leveren bij eventuele wijziging van deze veehouderij.

Het bouwen buiten de contouren van de geldende geurnormen van een veehouderij betekent daarentegen niet zonder meer dat kan worden uitgegaan dat ter plaatse geen geurhinder wordt ondervonden. Om aan te tonen dat geen geurhinder wordt ondervonden en een aanvaardbaar woon- en leefklimaat kan worden gerealiseerd, dient de geurbelasting ter plaatse van het geurgevoelige object te worden bepaald (voorgrond- en achtergrondbelasting). De geurhinder die ter plaatse van de geurgevoelige objecten ondervonden wordt, wordt uitgedrukt in een hinderpercentage. Het hinderpercentage is het percentage mensen dat de geur ten gevolge van de veehouderij(en) als hinderlijk ervaart. Deze hinderpercentages kunnen vervolgens worden vertaald naar een milieukwaliteit¹. De gemeenteraad maakt zelf de afweging welk hinderniveau of milieukwaliteit acceptabel is voor een goed woon- en leefklimaat.

De normen in de Wgv zijn afgestemd op een gemiddeld gebied waarin veehouderijen en geurgevoelige objecten op een redelijke afstand van elkaar zijn gelegen. Afhankelijk van het karakter van het gebied en de gewenste ruimtelijke inrichting, kan er een andere waarde voor de hoogst toegestane geurbelasting of andere afstand worden vastgesteld dan die in de Wgv zijn opgenomen. Daartoe voorziet de wet in een bevoegdheid van de gemeenteraad om bij een gemeentelijke verordening een andere waarde of afstand vast te stellen. De raad dient daarbij binnen een door de wet gestelde bandbreedte te blijven. Aan de verordening dient een gemeentelijke visie op de ontwikkeling van het buitengebied ten grondslag te liggen. De visie bevat de gewenste ruimtelijke inrichting van het gebied ten aanzien van de ontwikkeling van de veehouderijsector en van geurgevoelige objecten. De gemeentelijke visie kan worden vastgelegd in een bestemmingsplan, reconstructieplan, structuurvisie of een ander document waarop inspraak mogelijk is.

2.2 Activiteitenbesluit wet milieubeheer

De Wgv is van toepassing bij bedrijven waarvoor een omgevingsvergunningen milieu nodig is. Een veehouderij die geen omgevingsvergunningen milieu nodig heeft valt onder het Activiteitenbesluit. Voor een veehouderij die onder het Activiteitenbesluit valt gelden voor een groot deel dezelfde eisen als voor een veehouderij die onder de Wgv valt.

¹ RIVM (2015) Geur en gezondheid -GGD-richtlijn medische milieukunde. RIVM Rapport 2015-0106 Onderdeel Veehouderij en geur.

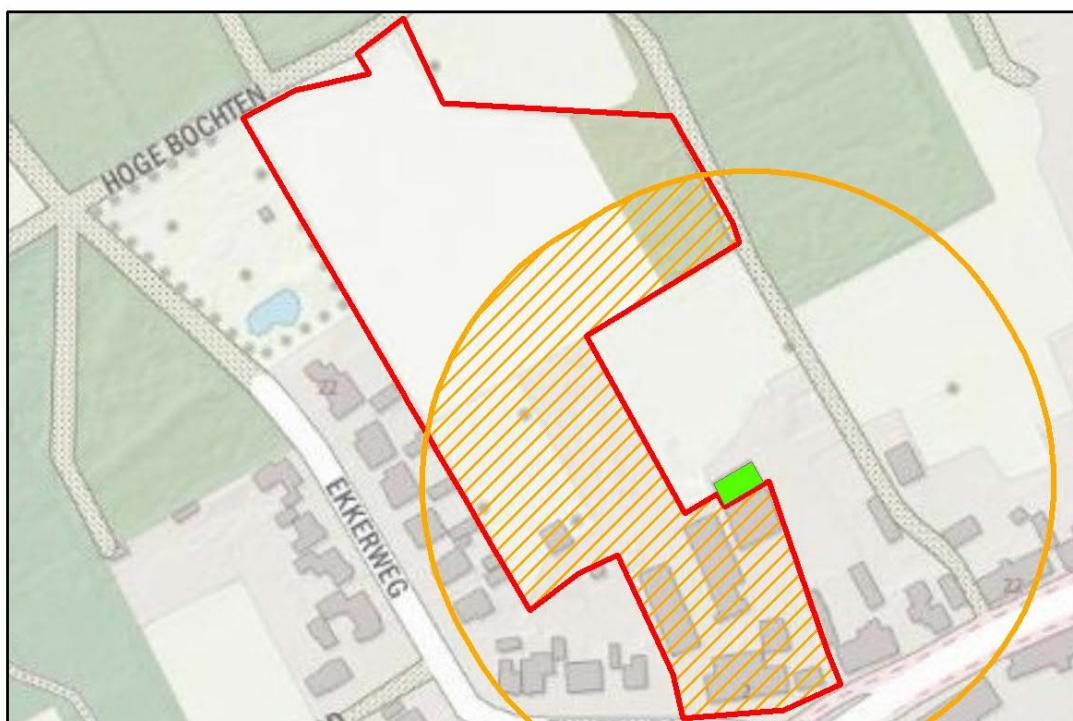

3 Effect beoordeling

De planontwikkeling vindt plaats op twee locaties: aan de Ekkerweg en aan de Beeken. De geurhinder is voor deze twee locaties hier verder apart beoordeeld.

3.1 Plangebied Ekkerweg 2

Met de ontwikkeling van de woningen in het plangebied verdwijnt de veehouderij aan de Ekkerweg 2. Direct naast dit plangebied ligt een veehouderij aan de Heijerstraat 26 waarvoor een melding Activiteitenbesluit is gedaan voor het houden van vleesstieren en overig vleesvee.

De woningen die in het plangebied aan de Ekkerweg worden gerealiseerd, betreffen Ruimte voor Ruimte woningen. Voor dit type woningen zijn in het Activiteitenbesluit minimum afstandsnormen opgenomen die moeten worden gehouden ten opzichte van omliggende veehouderijen. Het plangebied zal direct grenzen aan de reeds bestaande bebouwde kom. Gelet op de inrichting van het plangebied en de directe omgeving kan het plangebied worden gekenmerkt als bebouwde kom². De minimumafstand die tussen Ruimte voor Ruimte woningen en veehouderijen gehouden moet worden bedraagt 100 meter voor woningen die binnen de bebouwde kom zijn gelegen. Het plangebied ligt voor een deel binnen deze minimumafstand (zie figuur 3-1).

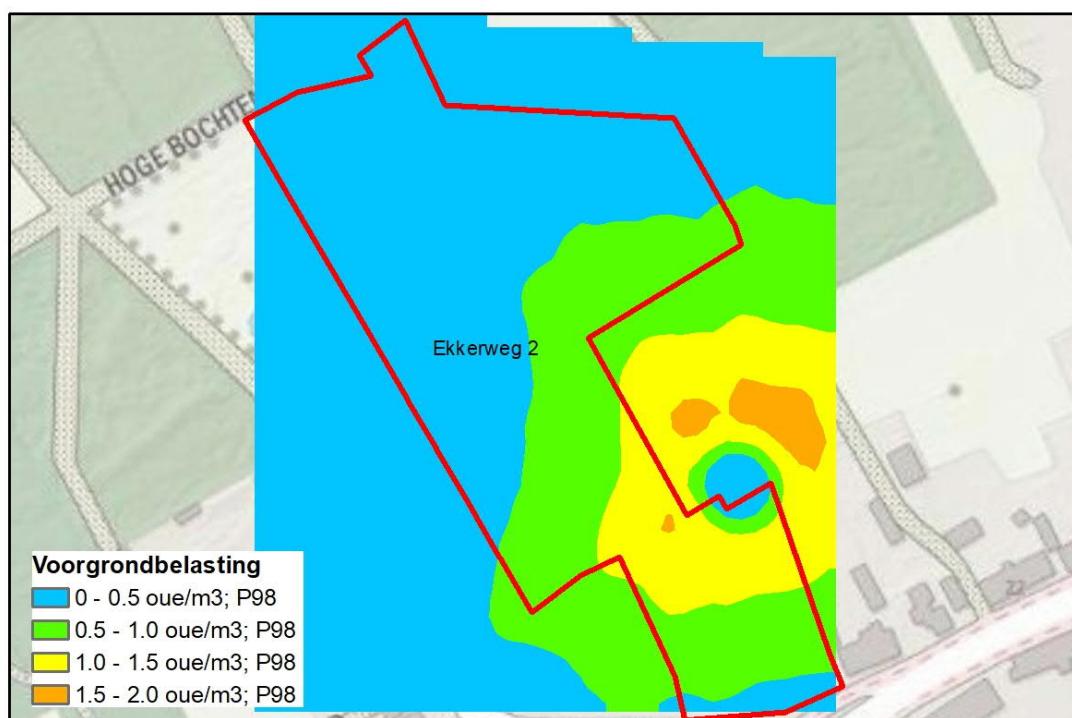

Figuur 3-1 Minimumafstand 100 m ten opzichte van de veehouderij Heijerstraat 26. Rood omrand; plangebied; Groen gemarkeerd: stal Heijerstraat 26; Oranje lijn: zone 100 meter rondom stal Heijerstraat 26. Oranje gearceerd: deel van plangebied binnen 100 meter van stal Heijerstraat 26

De minimumafstand is niet van toepassing indien de geurbelasting op de geurgevoelige objecten lager is dan die geldt voor het gebied waarin de woningen zijn gelegen

² ABRvS 201011530/1/R3

(Activiteitenbesluit artikel 3.116, derde lid). Voor geurgevoelige objecten binnen de bebouwde kom dient de geurbelasting op de geurgevoelige objecten dan lager te zijn dan 3 ou_e/m³; P98³.

Voor de Heijerstraat 26 is de geurbelasting binnen het plangebied berekend (voorgrondbelasting). Voor de berekeningen is gebruik gemaakt van de emissiegegevens uit het Bestand Veehouderijen Bedrijven (Web-BVB)⁴. In bijlage 2 zijn de geuremissies van de veehouderij aan de Heijerstraat 26 opgenomen. In bijlage 3 is de berekening van de voorgrondbelasting van deze veehouderij opgenomen. De berekeningen van de geurbelasting zijn uitgevoerd met het V-STACKS-versie 2010.1. In figuur 3-2 is de geurbelasting binnen het plangebied ten gevolge van de veehouderij inzichtelijk gemaakt. De hoogste geurbelasting binnen het plangebied bedraagt 1,6 ou_e/m³; P98.

Figuur 3-2 Geurbelasting (voorgrondconcentratie) binnen het plangebied (rood omlijnd) ten gevolge van Heijerstraat 26

Op basis van voorgaande kan worden gesteld dat de geurgevoelige objecten in het plangebied niet worden blootgesteld aan waarden boven de geldende geurnorm van 3 ou_e/m³; P98. Van de minimumafstand van 100 meter kan hiermee worden afgeweken. De realisatie van het plangebied zal ook niet tot een belemmering van de bedrijfsvoering van de naastgelegen veehouderij leiden.

Om na te gaan of een aanvaardbaar woon- en leefklimaat kan worden gegarandeerd binnen het plangebied is ook de achtergrondbelasting binnen het plangebied berekend. Voor de achtergrondbelasting is de cumulatieve geurbelasting van alle veehouderijen in een zone van vijf kilometer rondom het plangebied berekend⁵. Voor de berekening is gebruik gemaakt van de emissiegegevens uit het Bestand Veehouderijen Bedrijven (Web-BVB)⁶.

³ Verordening geurhinder en veehouderij Bergeijk 2017.

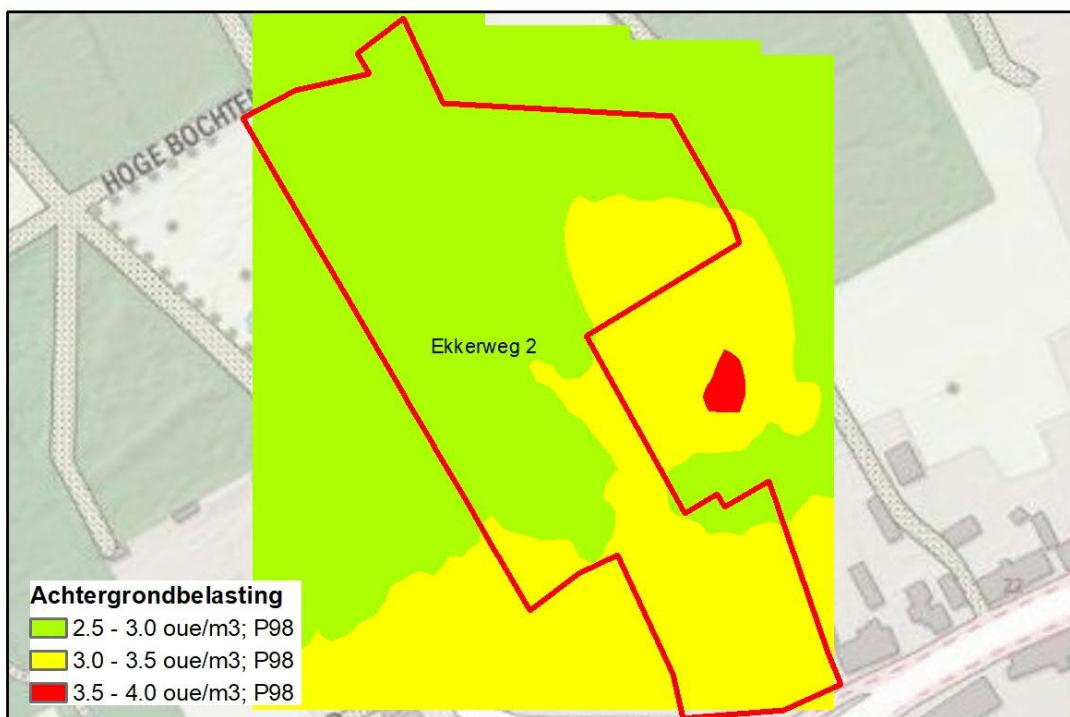

⁴ <https://bvb.brabant.nl/webbvb/>, downloaddatum: 17-05-2019

⁵ Hierbij is als worst case uitgangspunt gehanteerd dat er geen wijziging zijn op de veehouderij aan de Beeken 3.

⁶ <https://bvb.brabant.nl/webbvb/>, downloaddatum: 17-05-2019

In bijlage 2 zijn de geuremissies van de veehouderijen binnen vijf kilometer van het plangebied opgenomen. In bijlage 4 is de berekening van de achtergrondbelasting opgenomen. De berekeningen van de geurbelasting zijn uitgevoerd met het V-STACKS-versie 2010.1. De maximale achtergrondbelasting binnen het plangebied bedraagt 3,3 ou_e/m³; P98 (zie figuur 3-3).

Op basis van de geurbelasting (voorgrond- en achtergrondbelasting) is het hinderpercentage voor het plangebied bepaald⁷. De waarde van de maximale achtergrondbelasting binnen het plangebied van 3,3 ou_e/m³; P98 komt overeen met een aantal gehinderden van 5-6 %. De waarde van de maximale voorgrondbelasting binnen het plangebied van 1,6 ou_e/m³; P98 komt overeen met een aantal gehinderden van 5-6 %. Uit de Gebiedsvisie geurhinder en veehouderij Bergeijk blijkt dat een hinderpercentage < 12% (10,0 ou_e/m³; P98) als aanvaardbaar woon- en leefklimaat wordt geacht. Het maximaal aantal gehinderden ligt onder de 12% en hiermee is conform de gebiedsvisie een aanvaardbaar woon- en leefklimaat binnen het plangebied gegarandeerd.

Figuur 3-3 Geurbelasting (achtergrondconcentratie) binnen het plangebied

3.2 Plangebied Beeken 3

Met de planontwikkeling schakelt de varkenshouderij aan de Beeken 3 om naar een paardenhouderij. De geurhindersituatie in de omgeving van deze locatie verbetert hierdoor. De huidige stal die binnen het bouwvlak is gelegen, wordt hiervoor deels gesloopt en het overige deel wordt omgebouwd tot paardenstal.

De nieuwe paardenhouderij zal maximaal 20-25 paarden houden. Paarden hebben geen geuremissiefactor. Wel dienen bij een paardenhouderij minimumafstanden te worden aangehouden tussen de veehouderij en geurgevoelige objecten (zie bijlage 1). Buiten de bebouwde kom bedraagt deze minimumafstand 50 meter. Binnen 50 meter van het bouwvlak liggen geen geurgevoelige objecten (zie figuur 3-4).

⁷ In de handreiking Wgv is een relatie weergegeven tussen geurbelasting en hinderpercentages. Handreiking bij Wet geurhinder en veehouderij. Aanvulling: Bijlagen 6 en 7. Versie 1,0, aanvulling van 1 mei 2007. Tabel A en B.

Figuur 3-4 Minimumafstand 50 m ten opzichte van bouwvlak Beeken 3. Rood omrand; plangebied; Groen gemarkeerd: bouwvlak Beeken 3; Oranje lijn: zone 50 meter rondom bouwvlak Beeken 3

Ten gevolge van de planwijziging worden geen geurgevoelige objecten blootgesteld binnen de geldende geurnorm. Er worden met de planontwikkeling aan de Beeken 3 geen nieuwe geurgevoelige objecten gerealiseerd. Dit zal dan ook niet tot een belemmering van de bedrijfsvoering van de naastgelegen veehouderijen leiden.

4 Conclusie

Met het bestemmingsplan verdwijnt de veehouderij aan de Ekkerweg 2 en schakelt de veehouderij aan de Beeken 3 om van varkenshouderij naar paardenhouderij. Dit betekent dat de geuremissies respectievelijk verdwijnen en verminderen. In de omgeving van het plangebied zal hierdoor de geurhindersituatie verbeteren.

Binnen het plangebied aan de Ekkerweg 2 wordt de bouw van woningen mogelijk gemaakt. Ter hoogte van de woningen wordt voldaan aan de geldende geurnorm en is er een aanvaardbaar woon- en leefklimaat. De realisatie van de woningen in het plangebied zal geen belemmering vormen voor de omliggende veehouderijen.

Binnen het plangebied aan de Beeken 3 wordt een paardenhouderij mogelijk gemaakt. Binnen de geldende afstandsnorm van deze veehouderij liggen geen geur gevoelige objecten. Er worden op deze locatie geen nieuwe geurgevoelige objecten gerealiseerd. Dit zal dan ook niet tot een belemmering van de bedrijfsvoering van de omliggende veehouderijen leiden.

¹ Van de buitenzijde van het dierenverblijf tot de buitenzijde van het geurgevoeling object.

² Van het emissiepunt van het dierenverblijf tot de buitenzijde van het geurgevoeling object..

³ Van het emissiepunt van het dierenverblijf tot de buitenzijde van het geurgevoeling object.

⁴ Van het emissiepunt van het dierenverblijf tot de buitenzijde van het geurgevoeling object.

Afstandsnormen pelsdieren artikel 4 lid 1 Wgv

| Aantal fokteven | | | | | | | | | |
|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|---------------------|
| 1-1000 | | 1001-1500 | | 1501-3000 | | 3001-6000 | | 6001-9000 | |
| Binnen bebouwde kom | Buiten bebouwde kom |
| 175 m | 100 m | 200 m | 125 m | 225 m | 150 m | 250 m | 175 m | 275 m | 200 m |

1. In de berekening worden jongen en reuen buiten beschouwing gelaten.

2. Indien meer dan 9000 fokteven worden gehouden, wordt de afstand voor elke extra 3000 fokteven met 25 meter vergroot.

3. Indien de pelsdieren in emissiearme huisvesting worden gehouden, waarbij de ammoniakemissie kleiner dan of gelijk is aan 0,25 kg per dierplaats per jaar, worden de afstanden uit de tweede rij van de tabel ('buiten bebouwde kom') met 25 meter verkleind.

4. Indien het geurgevoeling object onderdeel uitmaakt van een andere veehouderij, of op of na 19 maart 2000 heeft opgehouden deel uit te maken van een andere veehouderij, bedraagt de afstand tot dat geurgevoeling object:

a. ten minste 100 meter indien het geurgevoeling object binnen de bebouwde kom is gelegen, en

b. ten minste 50 meter indien het geurgevoeling object buiten de bebouwde kom is gelegen.
